RE: POU Application for PWS # 14-032, Dateland Water LLC

Dear Mr Thomas:

This letter is to inform you that your system's application to install Point Of Use treatment devices for arsenic and fluoride compliance has been approved. Please complete the enclosed "Certification of POU Installation" form and return it to the department within 120 days of receipt of this letter.

This plan must be considered a changeable document, and must be reviewed and updated as your systems grows or changes. To this end, treatment devices must be installed on all current and future service connections within your distribution system, regardless of building occupancy. As your system grows, you may add additional units of the type already approved by the department. In this case, please complete the appropriate section of the "Certification of POU Installation" form and submit it to the department. However, if in the future you consider a different treatment device than the one approved in this plan, you must submit a new POU application for review and approval.

Current and future compliance monitoring will be based on your initial monitoring year. In accordance with monitoring requirements outlined in this plan, you will be required to submit two laboratory samples no later than December 31, 2007. The next round of laboratory samples will be due in 2009, and so on. All laboratory sample results must be submitted to the department on an ADEQ approved "DWAR-2IN: Drinking Water Inorganic Chemical Analysis Report" form, available on our Web site at <http://azdeq.gov/environ/water/dw/download/02inorg.pdf>

In addition, this plan, including any future updates, and all test results, laboratory or on-site, must be made available for review by ADEQ field inspectors or their agents upon request.

If you have any questions about your application, please feel free to contact me.

Sincerely,

Brian Popadak
